

Pharmaceuticals and Medical Devices

Overview

Carlton Fields has extensive experience litigating drug and medical device matters on behalf of industry-leading national and international clients. We defend our clients in individual, mass tort, class action, and other complex litigation matters in state and federal courts, from inception through appeal.

Our pharmaceutical work puts us at the forefront of cutting-edge issues, including preemption of medical device and prescription drug claims, the learned intermediary doctrine, comment k, market share liability, and brand name liability for generic use. We routinely take on *Daubert* and *Frye* expert challenges and summary judgments on medical causation. Our experience encompasses all types of pharmaceutical products and medical devices.
