

**We are pleased to announce the launch of SQRBlock Solutions LLC, an innovative one-stop destination for clients who want to implement enterprise blockchain business solutions.**

SQRBlock identifies and coordinates the development of blockchain-powered applications for every industry sector. We deliver comprehensive solutions that include blockchain platform selection, application design, product development, launch and monitoring.

The blockchain platform offered through B-Square Lab's Square BaaS and Square Ledger provides an intuitive interface allowing accurate, easy, quick, and cost-effective development of Dapps as a part of B-Square Lab's proprietary DaaS (Decentralized Framework as a Service). The seamless integration of legacy systems with blockchain allows blockchain to be added to any critical functionality of existing systems. We also enable clients to confidently navigate the legal, regulatory, and compliance minefields associated with blockchain deployment.

Blockchain holds immense potential for improving efficiency, providing real-time information, and reducing costs. This fast-growing technology successfully drives innovative solutions while solving real business problems.

*Learn how blockchain is transforming industries, and how SQRBlock can help your company innovate, in this short video.*

Despite the compelling cases for the use of blockchain technology, many companies are unsure how to use it. This is because of the lack of guidance about the technology, and the many considerations required for its development and implementation.

**We invite you to learn more about SQRBlock Solutions at our website, [www.sqrblock.com](http://www.sqrblock.com), and download our case study and overview of services.**
