

# Fighting Fraud with Biometrics in the Life Insurance Industry

January 31, 2019

Josephine Cicchetti, co-chair of Carlton Fields' Privacy and Cybersecurity task force, authored the article "Fighting Fraud with Biometrics in the Life Insurance Industry," which was published in *The Practical Lawyer*. While technological tools that can recognize users' fingerprints, voices, and faces are helpful for identity authentication, the collection of such data creates privacy and security concerns, Cicchetti wrote.
